

Town of Canterbury

Kinne Road Solid Waste Transfer Station

Asphalt bid specs:

The area to be installed is 36' x 192'. The final surface will be 4" thick bituminous concrete pavement constructed with two equal thickness courses of 2" each.

Two catchbasins in the area to be paved are already installed. The pavement will slope towards each catch basin all 4 sides. A plan detail is attached.

The base 2" layer will be constructed with Class I Bituminous concrete. The overlay 2" layer will be constructed of Class II bituminous concrete.

Inspection and material testing and verification will be conducted per standard D.O.T. guidelines.

Please coordinate site visits if necessary with the Canterbury First Selectmen's office, 1 Municipal Drive, Canterbury, CT 06331, 860-546-9693.
